Stop thieves, not customers.

A push button dispenser with time delay that is simple for customers and stops thieves.

InVue’s T1000 is the only self service fixture in the market that increases sales while preventing theft. Intuitive dispensing helps you sell more merchandise with no associate assistance. The easy to use push button creates the best customer experience, and the time-delayed release prevents sweeping theft. T1000 is a single position dispenser. Rather than committing to an expensive shelf segment, the small footprint maximizes display space.
FEATURES AND BENEFITS

1. Simple push of a button dispenses one package
2. Time delay of 5 seconds between dispenses deters thieves
3. Individual merchandise positions increases anti-sweep security
4. Integrated price tag for a simple and clean display
FEATURES AND BENEFITS (continued)

1 Merchandising space gives customers an intuitive way to replace unwanted merchandise, meaning merchandise stays off the floor

2 Interchangeable coils let you maximize merchandising space for different sized packaging

3 Interchangeable rods allow you to leverage the same dispenser on multiple displays (ie: pegboard, slatwalls and mounting bars)

4 No proprietary key necessary for installation
