

# Telia Sonera

Telia Sonera is a leading telecommunications company in Sweden and Finland.

## SITUATION

Telia was looking for a tablet solution that allowed customers to digitally sign contracts within their store as they purchased devices. The display needed to be easy for customers and associates to use and feature a small footprint as to not take away from valuable space required for the electronics on display.

## INVUE SOLUTION

The CT100 was the perfect choice for Telia. Its simplistic design fit well within the space allotted. The CT100 is easy for customers to navigate through the digital contracts displayed on the tablet. Once customers complete the contract, the associate saves it as a PDF and sends it electronically to the customer, thus saving time and money.
