

You can install  
faster than it took  
you to read this!

---

Completely self contained security. No key, no tools and no programming necessary.

Economically protects a wide range of products... anywhere in your store.

Installs in less than 30 seconds!

### FEATURES AND BENEFITS

- 1 Innovative alarm unit available with two sensor types
- 2 LED shows product is secure — no guessing
- 3 Protects numerous types of merchandise using either a small plunger or a noose sensor
- 4 Flex adhesive for micro plunger allows you to protect curved devices
- 5 Lower cost of ownership — no keys required, high quality cord, and minimal time to install and re-merchandise
- 6 Easy re-merchandising and fewer false alarms using high quality 3M adhesives

## Zips Basic

---

### DETAILS

#### *Installation:*

Zips Basic will be armed within five seconds of installation after all plungers are depressed. An audible chirp and a single LED flash will indicate the unit is armed.

#### *Security:*

The LED on the Zips Basic will flash approximately every eight seconds — that is your indication the merchandise is protected.

#### *During a Zips Basic alarm event:*

- › Alarm will last for 60 seconds and then time out
- › The unit will automatically re-arm when all plungers are depressed

#### *Re-merchandising:*

1. Remove Zips Basic from merchandise
2. Re-install on the new merchandise using replacement adhesives noted above (the alarm will timeout and re-arm).

#### *Life expectancy:*

The Zips Basic contains a non-replaceable battery that under normal usage is estimated at more than a year of protection. Normal usage is less than four alarms or re-merchandising events per month. When the unit is near end of life, the LED will flash and the alarm unit will chirp every six seconds. The battery will be fully depleted within about a week from this, and the Zips Basic unit will need to be replaced.
